## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 18-28, 30 and 31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants amended the claims to recite a drive source for controlling a direction of rotation of the substrate holder to maximize a distance traveled by the processing liquid. Such limitation is not supported by the original disclosure. While the original disclosure shows that the distance, which the liquid travels, can be greater than the distance between the supply nozzle and the suction nozzle, there is no disclosure of the concept of controlling the direction of rotation to maximize the distance traveled by the liquid. Thereby, the amended claims are not supported by the original disclosure. It is noted that the newly introduced concept is readable, for example, on controlling the direction of rotation at least partially back-and-forth to maximize the distance traveled by the liquid.

***Response to Amendment***

3. The amendment filed 4/4/08 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

Applicants amended the claims to recite a drive source for controlling a direction of rotation of the substrate holder to maximize a distance traveled by the processing liquid. Such limitation is not supported by the original disclosure. While the original disclosure shows that the distance, which the liquid travels, can be greater than the distance between the supply nozzle and the suction nozzle, there is no disclosure of the concept of controlling the direction of rotation to maximize the distance traveled by the liquid. Thereby, the amended claims are not supported by the original disclosure.

Applicant is required to cancel the new matter in the reply to this Office Action.

***Response to Arguments***

4. Applicant's arguments with respect to claims 18-28, 30 and 31 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
